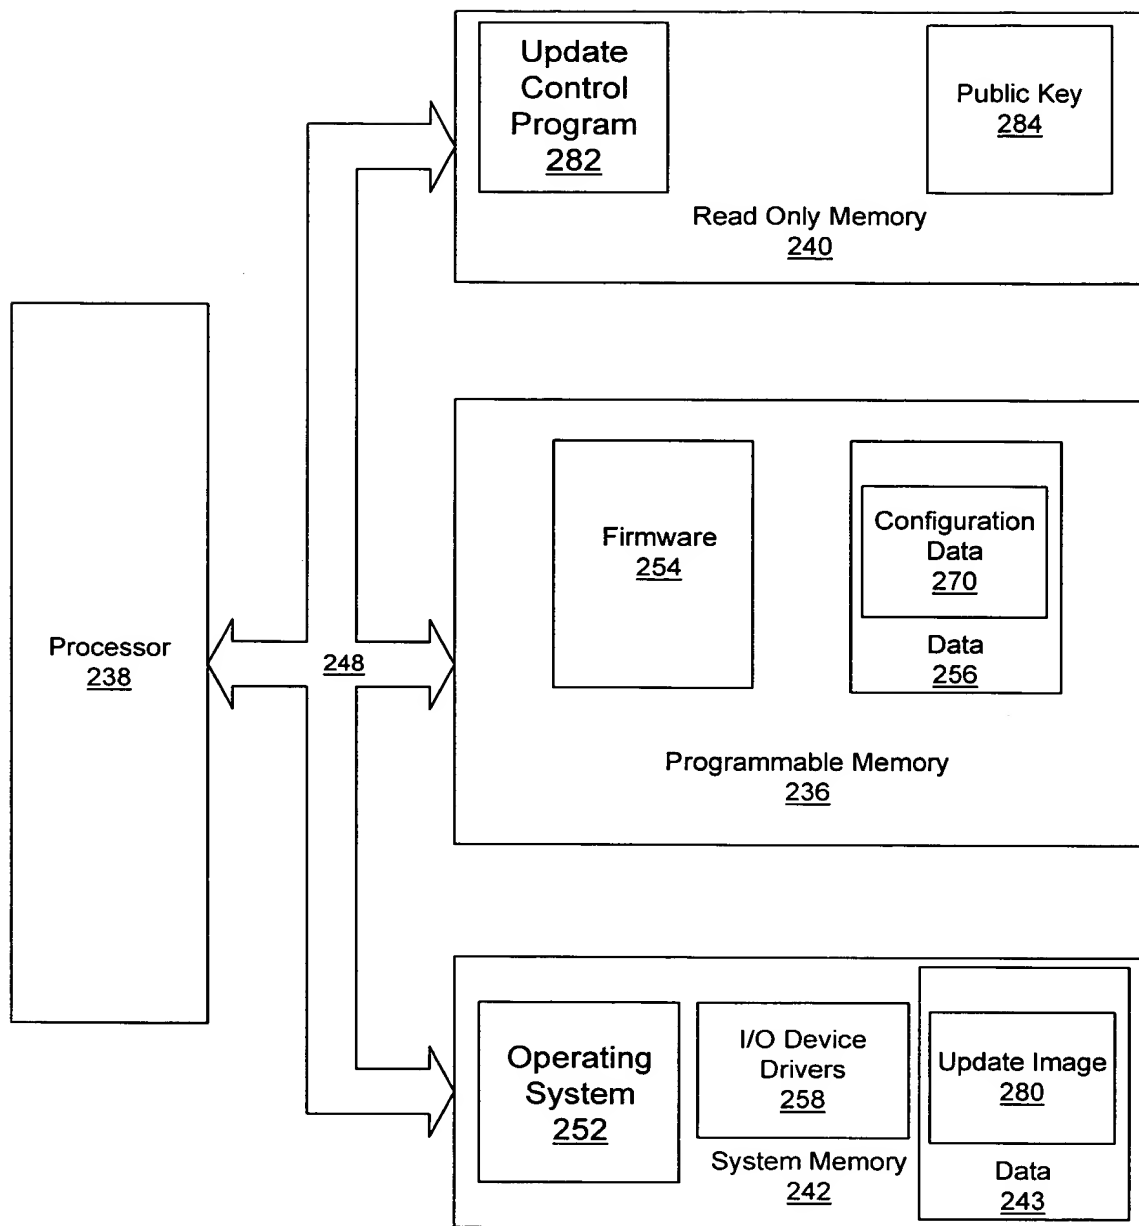

Figure 3

1. The first part of the report, which is the most important, is the *Summary*. This should be written in a clear, concise, and factual manner. It should state the purpose of the study, the methods used, the results obtained, and the conclusions drawn. It should be written in a way that is easy to read and understand.

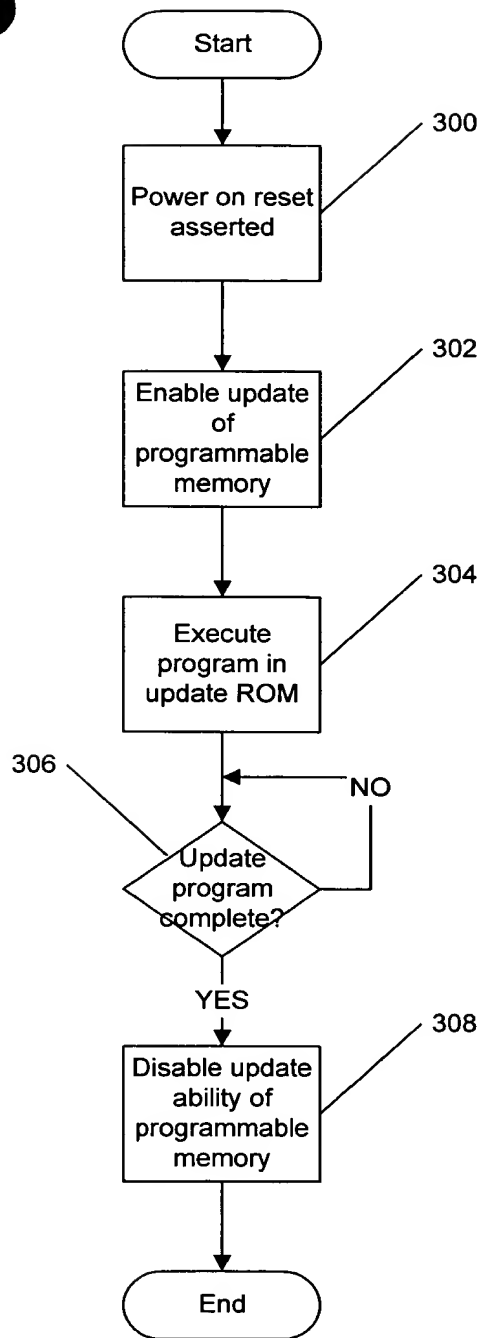

Figure 4A

```
graph TD; Start([Start]) --> 300[Power on reset asserted]; 300 --> 302[Enable update of programmable memory]; 302 --> 320[Enable access to Update ROM]; 320 --> 304[Execute program in Update ROM]; 304 --> 306{Update program complete?}; 306 -- NO --> 304; 306 -- YES --> 308[Disable update ability of programmable memory]; 308 --> 322[Disable access to Update ROM]; 322 --> End([End]);
```

The flowchart illustrates the process of updating a program. It begins with a 'Start' terminal, followed by a process block 'Power on reset asserted' (300). This is followed by 'Enable update of programmable memory' (302), then 'Enable access to Update ROM' (320). The next step is 'Execute program in Update ROM' (304). A decision diamond 'Update program complete?' (306) follows. If the answer is 'NO', the flow loops back to the entry point of block 304. If the answer is 'YES', the flow proceeds to 'Disable update ability of programmable memory' (308), then 'Disable access to Update ROM' (322), and finally reaches the 'End' terminal.
